

## Early Journal Content on JSTOR, Free to Anyone in the World

This article is one of nearly 500,000 scholarly works digitized and made freely available to everyone in the world by JSTOR.

Known as the Early Journal Content, this set of works include research articles, news, letters, and other writings published in more than 200 of the oldest leading academic journals. The works date from the mid-seventeenth to the early twentieth centuries.

We encourage people to read and share the Early Journal Content openly and to tell others that this resource exists. People may post this content online or redistribute in any way for non-commercial purposes.

## MEXICO.

*Sanitary report from Tampico.*TAMPICO, MEXICO, *July 18, 1897.*

SIR: The health of this port remains about the same as per last report. Mortality for April, 76; May, 83; June, 72. No deaths from yellow fever, smallpox, cholera, or typhus fever, on official record. Arrivals of American seamen for quarter ended June 30, 1,692, with no sickness or deaths.

The boards of health of Mobile and New Orleans have a health inspector at this port who makes reports direct to them. The mortality of this port is in a great measure confined to the Indian village, 4 miles below the city. They persist in their refusal to employ medical advice.

I am sir, yours respectfully,

JOHN MAGUIRE,  
*United States Consul.*

## STATISTICAL REPORTS.
